

Hello! thank you for your purchase!

First of all let me show you the structure.

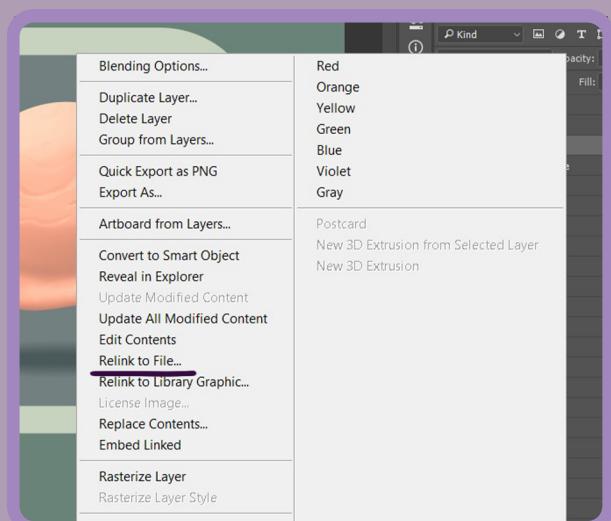

iceCream.psd - this is a file with all content
objects - folder for Smart Objects

png - exported pictures

Each item (ice cream ball with drips, just ice cream ball, cone) is a **Smart Object** that is located in a separate file and can be modified if desired.

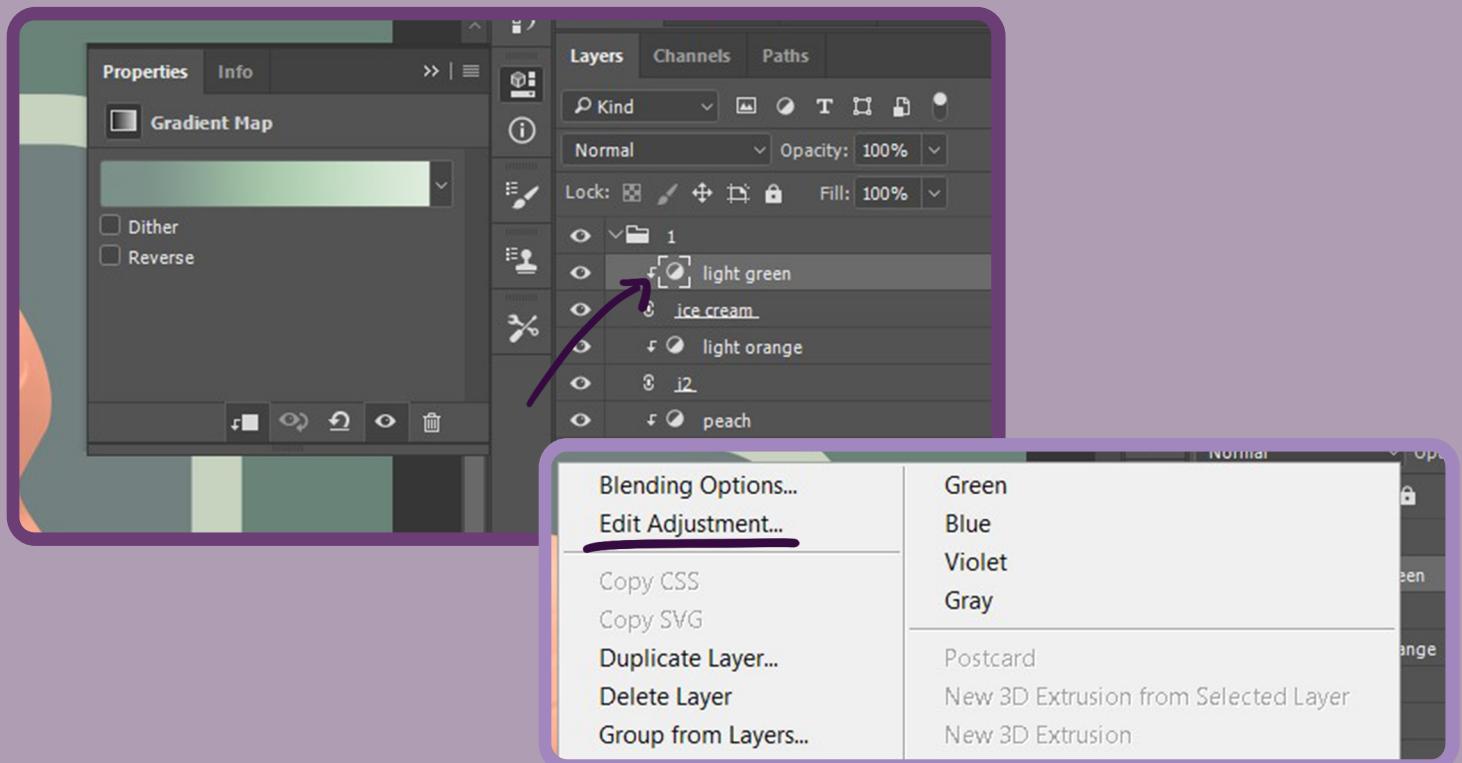

Double-click the smart object thumbnail in the **Layers** panel to open the original file. If for some reason the connection is lost, then you can certainly relink to the file.

Reference information on smart objects can be found on the website

<https://helpx.adobe.com/photoshop/using/create-smart-objects.html>

Edit colors

double-click the color thumbnail in the layers panel to open the Properties panel or right-click and select Edit Adjustment.

to edit the currently-displayed gradient fill, click the gradient fill, and then modify the existing gradient fill or create a gradient fill in the Gradient Editor.
